

EXPLORER PLUS™ EXP

EXPLORER™ EXR

Welcome to the future of laboratory weighing precision with the OHAUS Explorer Plus™ EXP Series and Explorer™ EXR Series. This new generation of laboratory balances designed to enhance your workflow with unparalleled user experience, outstanding weighing performance, advanced communication capabilities, and an eco-friendly design. Join us in discovering the possibilities with the OHAUS Explorer Series.

New OHAUS Explorer Series:
The Future of Laboratory Weighing

EXPLORER PLUS™ EXP

Table of Contents

EXPLORER™ EXR

Intelligent User Experience	4
Outstanding Weighing Performance	10
Supports Compliance for Data Traceability	12
Eco-Friendly Design	14

Model Comparison Table	18
Model Offering	19
Accessories	19

7-Inch Touchscreen Display

Vibrant colors, an easy-to-clean glass panel, and chemical resistance ensure a clear and durable interface.

Detachable Terminal and Base

Designed for flexibility, and suitable for small lab cabinets or fume hoods.

Effortless Setup and Monitoring

Motorized Leveling System with a digital-level bubble, that ensures a smooth and straightforward setup.

Intuitive Sample Handling and Reliable Status Indicators

- Features an intuitive sample spotlight that provides clear visibility, ensuring precise and hassle-free sample handling.
- Customized terminal and draftshield status lights provide clear and immediate feedback to underload or overload conditions.

Intelligent User Experience

Sample weighing kit includes Centrifuge Tube Holder, Rotary Evaporators Holder, Needle Holder, and Filter Paper Holder

Centrifuge Tube Holder

Rotary Evaporator Holder

Enhanced Anti-Pinch Automatic Draftshield Door

Safety protection with IR sensor operation for easy sample access and preventing hand injuries.

— Half-open design is tailored for powder samples that require a longer time to stabilize with airflow.

How To: IR Sensor & Auto Door
- Explorer™ Balance Series

Half Open

Full Open

Open and Close with Anti-Pinch Sensor

Standard Square Weighing Pan

Designed for laboratory efficiency and specifically designed to assist in sample preparation. The semi-micro model pan is made with zinc alloy, the analytical and precision models have pans made with SST316 and the High-Capacity models with SST304.

Needle Holder

Filter Paper Holder

Semi-Micro Balance
(Zinc alloy)

Analytical Balance
(SST316)

Precision Balance
(SST316)

High-Capacity Balance
(SST304)

Sample Libraries Shared among Applications

- Apply to 15 weighing applications for Explorer Plus EXP and 11 for Explorer EXR. The large sample profile streamlines the workflow.
- 3000 sample libraries for Explorer Plus EXP and 1000 sample libraries for Explorer EXR.

How To: Library Function - Explorer™ Balance Series

Removable Draftshield

For easy cleaning and long-term care and specific large volume weighing applications.

1 Unlock the draftshield fixed ring

2 Remove EMC plate

3 Remove the complete draftshield

How To: Removing Draftshield - Explorer™ Balance Series

Out-of-Box Packaging

No assembly required, saving time and effort.

How To: Removing Draftshield - Explorer™ Balance Series

Outstanding Weighing Performance

Digital High-Speed Load Cell

The digital weighing components (DWC) offer the advantage of creating self-contained load cell modules. Rapid and precise measurements with this advanced technology ensures weighing processes are both swift and highly accurate.

Elevated Digital Load Cell Platform

Equipped with 3 ambient sensors to measure key load cell factors: temperature, humidity, and air pressure. Comprehensive monitoring ensures optimal weighing conditions, enhancing the accuracy and reliability of the measurements.

Internal Calibration Systems

Automatic, user-triggered, and span calibration options ensure precise measurements.

Anti-Static Draftshield

Reduces static electricity around the balance for consistent results.

Built-In Ionizer in Draftshield Models

Removes the static charge from the sample surface and neutralizes the weighing chamber for a stable environment.

Routine Repeatability Test

Ensures consistent long-term accuracy and reliability. Ideal for critical applications such as weighing in regulated environments, where meeting strict uncertainty requirements is essential (e.g., pharmacopeia mandates uncertainty $\leq 0.10\%$).

- The Minimum weight is calculated from the repeatability result.
- Regular monitoring of balance repeatability is essential, as it can vary over time or due to environmental changes.
- This application guides the user to perform the test, and then calculates the repeatability result and minimum weight value.

How To: Performance Test - Explorer™ Balance Series

Enhanced Security and User Management

Optional Fingerprint Login System for secure and personalized access. This accessory ensures that only authorized users can access the system, providing a high level of security and data protection.

User management system offering 4 levels of access with an internal system log capacity of 100,000 entries, enabling the tracking and monitoring of user activities efficiently, ensuring compliance and accountability.

How To: User Management
- Explorer™ Balance Series

**Supports Compliance
for Data Traceability**

Equipped with multiple USB ports, offering unparalleled flexibility.
The direct to Excel feature is designed for users who lack the authorization to install drivers, providing a basic yet highly user-friendly solution for data transfer.

USB A and C ports, Bluetooth® and WiFi connectivity

RJ11
for Fingerprint accessory

USB A and USB C ports

Ethernet port

HID Connection

- Human Interface Device allows connections to computers without the need for drivers.
- Easy integration with LIMS and MES systems.

Time Synchronization

Network Time Protocol (NTP) ensures accurate timekeeping.

Electronic Signature

When the Electronic Signature feature is enabled, the User ID will be used in the printout field when the User ID content option is selected.

Direct Data Transfer

Direct export to Excel and saving data to USB in CSV and PDF formats.

Highly Flexible Connectivity

Explorer Plus™ EXP

- 2x USB Host Type A
- 1x USB Device Type B
- 1x USB Device Type C
- 1x Ethernet
- 1x RJ11 for Fingerprint accessory
- 1x RS-232
- 1x Optional Bluetooth® / WiFi dongle (through USB Host Type A)

Label Printing Function

2 preset templates and 10 customizable templates for semi-finished product samples transfer management.

System Log

All the changes made on balance setting will keep records in system log file. e.g. every printed data, date/time change, balance setting changes, perform calibration action, user log in/log out, user account create/edit/delete and etc. These system log files can be reviewed and exported as a PDF to a USB flash drive.

Explorer™ EXR

- 2x USB Host Type A
- 1x USB Device Type C
- 1x Ethernet
- 1x RS-232
- 1x Optional Bluetooth® / WiFi dongle (through USB Host Type A)

Eco-Friendly Design

Incorporating recycled materials, implementing power-saving functions, utilizing dematerialized components, and reducing shipping weight supports sustainable product goals.

Power Consumption

65% reduction in Sleep Mode.

Reduced Shipping Weight

36% weight reduction for non-draftshield models, 64% weight reduction for draftshield models.

Recycled Materials

Up to 58% of total components. Aluminum Construction: Replaces most plastic materials for durability and sustainability.

Dematerialization

Reduces the number of components to improve production efficiency.

End-of-Life Instructions

A comprehensive disposal guide helps manage the end-of-life process efficiently. This guide includes practical tips for data management and recycling, ensuring the disposal process is both effective and environmentally responsible.

ACT Label Certification

Eleven models are certified with the ACT Label, highlighting their environmental impact.

The ACT certification is based on three labels: EU, UK, and US.

Example: EXP225D/AD

To learn more about the ACT labels, please visit www.ohaus.com/products.

Weighing Applications

Basic Weighing

to determine the weight of items in the selected unit of measure.

Batch Printing (software feature of the Basic Weighing application) – to enable users to record and print a list of sample weights, with the capacity to handle up to 999 sample units in a single batch.

Parts Counting

to display the number of pieces or parts based on an average piece weight. Checks if the current sample pieces are within tolerances.

Check Counting

to check if the current sample pieces are within tolerances.

Percent Weighing

to display the current weight as a percentage of a reference weight.

Check Weighing

to check if the current weight is within tolerances.

Dynamic Weighing

to weigh objects that are not stable, such as animals.

Totalization

to sum the weights of multiple samples and report the statistical data for the series of samples.

Formulation

to combine various elements in proportionate amounts.

Differential

to calculate the difference in weights of multiple samples taken at different times.

Density Determination

to determine the density of a solid or a liquid

Peak Hold

to capture the maximum weight in a series of weighing.

Pipette Adjustment [EXP only]

to calculate the inaccuracy and imprecision of pipettes, used to check if a pipette's dosage is within tolerances.

SQC [EXP only]

to determine the homogeneity of items in batches over time.

Fill Weight Variation [EXP only]

to assess the uniformity of the weight of material dispensed into a container or mold throughout the manufacturing process.

Flow Rate Control [EXP only]

to manage the volume or mass of fluid (liquid or gas) that passes through a pump system over a specific period.

EXP vs. EXR

OHAUS Corporation

Headquartered in Parsippany, NJ, OHAUS Corporation manufactures an extensive line of balances and scales, lab equipment and lab instruments that meet the weighing, sample processing and measurement needs of multiple industries. We are a global leader in the laboratory, industrial and education markets, as well as a host of specialty markets, including the food preparation, pharmacy and jewelry industries. An ISO 9001:2015 manufacturer, OHAUS lab balances, industrial scales, lab equipment and lab instruments are precise, reliable and affordable, and backed by industry-leading customer support.
